

Simple Python Programs

- Python Program to Check Whether a Given Number is Even or Odd using Recursion
- Python Program to Check Whether a Number is Positive or Negative
- Python Program to Print All Odd Numbers in a Range
- Python Program to Check if a Number is a Palindrome
- Python Program to Reverse a Number
- Python Program to Print All Integers that Aren't Divisible by Either 2 or 3
- Python Program to Find Numbers which are Divisible by 7 and Multiple of 5 in a Given Range
- Python Program to Print All Numbers in a Range Divisible by a Given Number
- Python Program to Find Sum of Digits of a Number
- Python Program to Find Sum of Digit of a Number using Recursion
- Python Program to Find Sum of Digit of a Number Without Recursion
- Python Program to Count the Number of Digits in a Number
- Python Program to Find All the Divisors of an Integer
- Python Program to Find the Smallest Divisor of an Integer
- Python Program to Print Binary Equivalent of an Integer using Recursion
- Python Program to Print Binary Equivalent of a Number without Using Recursion
- Python Program to Print Table of a Given Number
- Python Program to Calculate Grade of a Student
- Python Program to Check if a Date is Valid and Print the Incremented Date if it is
- Python Program to Check Whether a given Year is a Leap Year
- Python Program to Convert Centimeters to Feet and Inches
- Python Program to Read a Number n and Compute $n+nn+nnn$

Python Programs on Numbers

- Python Program to Find Prime Numbers in a Given Range
- Python Program to Check Prime Number
- Python Program to Check whether a Number is Prime or Not using Recursion
- Python Program to Check Whether a Given Number is Perfect Number
- Python Program to Check Armstrong Number
- Python Program to Find Sum of First N Natural Numbers
- Python Program to Check if a Number is a Strong Number
- Python Program to Print Numbers in a Range Without using Loops
- Python Program to Print the Natural Numbers Summation Pattern
- Python Program to Find the Prime Factors of a Number
- Python Program to Check If Two Numbers are Amicable Numbers or Not
- Python Program to Find Whether a Number is a Power of Two
- Python Program to Calculate the Power using Recursion
- Python Program to Find Product of Two Numbers using Recursion
- Python Program to Find All Perfect Squares in the Given Range
- Python Program to Print All Possible Combinations of Three Digits

Simple Python Programs

- Python Program to Find Fibonacci Numbers using Recursion
- Python Program to Find the Fibonacci Series Without using Recursion
- Python Program to Find the Factorial of a Number using Recursion
- Python Program to Find the Factorial of a Number Without Recursion

Conversion Programs in Python

- Python Program to Convert Binary to Gray Code
- Python Program to Generate Gray Codes using Recursion
- Python Program to Convert Gray to Binary Code
- Python Program to Convert Celsius to Fahrenheit

Pattern Programs in Python

- Python Program to Print an Inverted Star Pattern
- Python Program to Print Pascal Triangle

Python Programs on Math Functions

- Python Program to Find the Roots of a Quadratic Equation
- Python Program to Find the Area of a Triangle
- Python Program to Find Simple Interest
- Python Program to Find Quotient and Remainder of Two Numbers
- Python Program to Find All Pythagorean Triplets in the Range
- Python Program to Compute a Polynomial Equation
- Python Program to Swap Two Numbers without using Third Variable
- Python Program to Count Set Bits in an Integer
- Python Program to Clear the Rightmost Set Bit of a Number
- Python Program to Test Collatz Conjecture for a Given Number
- Python Program to Find the Gravitational Force between Two Objects
- Python Program to Form an Integer that has Number of Digits at 10's Place & LSD at 1's Place
- Python Program to Print an Identity Matrix

Python Programs on Strings

- Python Program to Check if a String is a Pangram or Not
- Python Program to Remove Odd Indexed Characters in a string
- Python Program to Remove the nth Index Character from a Non-Empty String
- Python Program to Replace All Occurrences of 'a' with \$ in a String
- Python Program to Replace Every Blank Space with Hyphen in a String
- Python Program to Reverse a String using Recursion
- Python Program to Reverse a String Without using Recursion
- Determine How Many Times a Given Letter Occurs in a String Recursively
- Python Program to Find the Length of a String without Library Function
- Python Program to Count the Number of Words and Characters in a String
- Python Program to Count Number of Lowercase Characters in a String
- Python Program to Count the Number of Vowels in a String
- Count Number of Uppercase and Lowercase Letters in a String
- Python Program to Count the Number of Digits and Letters in a String
- Python Program to Print All Permutations of a String in Lexicographic Order using Recursion
- Python Program to Print All Permutations of a String in Lexicographic Order without Recursion
- Python Program to Check if the Substring is Present in the Given String
- Python Program to Find Common Characters in Two Strings
- Python Program to Print All Letters Present in Both Strings
- Python Program that Displays which Letters are in First String but not in Second
- Python Program that Displays Letters that are not Common in Two Strings
- Python Program to Create a New String Made up of First and Last 2 Characters
- Python Program to Find the Larger String without using Built-in Functions
- Python Program to Swap the First and the Last Character of a String
- Python Program to Sort Hyphen Separated Sequence of Words in Alphabetical Order
- Python Program to Count the Occurrences of Each Word in a String
- Python Program to Count Number of Vowels in a String using Sets
- Python Program to Check if a Given String is Palindrome
- Python Program to Check whether two Strings are Anagrams
- Python Program to Check whether a String is Palindrome or not using Recursion
- Python Program to Find All Odd Palindrome Numbers in a Range without using Recursion

Python Programs on Dictionary

- Python Program to Create Dictionary from an Object
- Python Program to Check if a Key Exists in a Dictionary or Not
- Python Program to Add a Key-Value Pair to the Dictionary
- Python Program to Find the Sum of All the Items in a Dictionary
- Python Program to Multiply All the Items in a Dictionary
- Python Program to Remove a Key from a Dictionary
- Python Program to Concatenate Two Dictionaries
- Python Program to Map Two Lists into a Dictionary
- Python Program to Create a Dictionary with Key as First Character and Value as Words Starting with that Character
- Python Program to Create Dictionary that Contains Number
- Python Program to Count the Frequency of Each Word in a String using Dictionary

Python Programs on Tuples

- Python Program to Create a List of Tuples with the First Element as the Number and Second Element as the Square of the Number
- Python Program to Remove All Tuples in a List Outside the Given Range
- Python Program to Sort a List of Tuples in Increasing Order by the Last Element in Each Tuple

Python Examples on List

- Python Program to Find Largest Number in a List
- Python Program to Find Second Largest Number in a List
- Python Program to Print Largest Even and Largest Odd Number in a List
- Python Program to Split Even and Odd Elements into Two Lists
- Python Program to Find Average of a List
- Python Program to Print Sum of Negative Numbers, Positive Even & Odd Numbers in a List
- Python Program to Count Occurrences of Element in List
- Python Program to Find the Sum of Elements in a List using Recursion
- Python Program to Find the Length of a List using Recursion
- Python Program to Merge Two Lists and Sort it
- Python Program to Remove Duplicates from a List
- Python Program to Swap the First and Last Element in a List
- Python Program to Sort a List According to the Second Element in Sublist
- Python Program to Return the Length of the Longest Word from the List of Words
- Python Program to Find the Number Occurring Odd Number of Times in a List
- Python Program to Generate Random Numbers from 1 to 20 and Append Them to the List
- Python Program to Remove the ith Occurrence of the Given Word in a List
- Python Program to Find the Cumulative Sum of a List
- Python Program to Find the Union of Two Lists
- Python Program to Find the Intersection of Two Lists
- Python Program to Flatten a List without using Recursion
- Python Program to Find the Total Sum of a Nested List Using Recursion
- Python Program to Flatten a Nested List using Recursion
